Preliminary June 2021 Climate Summary for West Central and Southwest Florida

As far as temperatures we've seen a decent range with some of the cloudy wetter days a couple of degrees below normal while the sunny dry days have been a few degrees above normal. For June West Central and Southwest Florida is seeing temperatures ranging from about 1.5 degrees below normal to nearly 2.5 degrees above normal, and a few of these above normal locations could end up in the Top Ten Warmest for June.

Temperature (F)
6/1/2021 - 6/24/2021

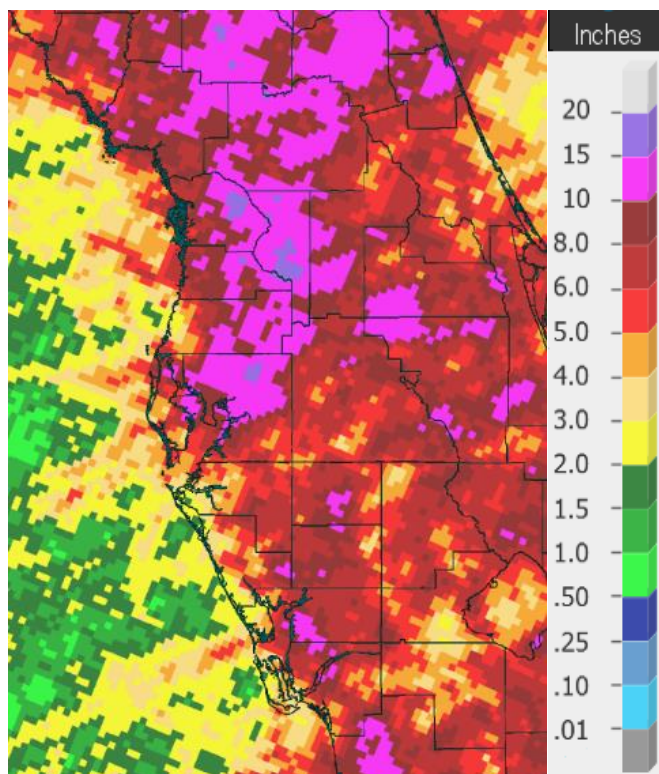

Departure from Normal Temperature (F)
6/1/2021 - 6/24/2021

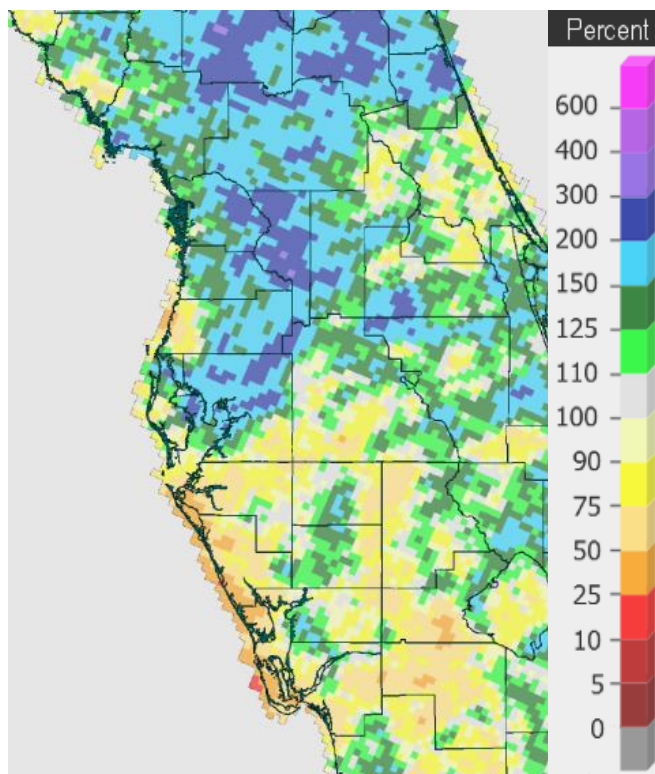

Graphics Source: NOAA Regional Climate Centers

As for rainfall, it's been a pretty typical June as our rainy season got underway with scattered to numerous showers and thunderstorms on many days. However, not that uncommon thanks to the random nature of our thunderstorms during the rainy season, we're seeing a wide range in rainfall amounts with some spots near the coast from around Sarasota-Bradenton south through Sanibel less than 50 percent of normal while other spots from around Interstate 4 northward are over 200 percent of normal.

June 1-24, 2021 Rainfall

June 1-24, 2021 Percent of Normal

On the following pages are tables of the Top Ten Warmest, Coolest, Wettest and Driest Junes at some official NWS locations, which include the average/total for this June where available, and the 1991-2020 Normal (average) temperature and rainfall for the month of June.

Chiefland 5 ESE (records began July 1956):
